PROFILE

BSc Computing graduate with hands-on experience spanning web development, QA/testing, and desktop application development in C++/Qt6. Built and tested multiple desktop applications during a final-year focus on desktop development, working with widgets, signals/slots, multithreading, and database integration. Professional experience includes backend/API-supported web platform work and structured QA testing, plus additional hands-on testing of software and games. Comfortable working across the stack, methodical in diagnosing issues, and quick to pick up new languages, frameworks, and tools.

TECHNICAL SKILLS

- C++ (Qt6: Widgets, Signals/Slots, Multithreading, Database Integration)
- Python (application scripting, backend logic)
- Web Development (HTML/CSS, backend systems, APIs, databases, CMS platforms)
- QA & Software Testing (feature validation, defect identification, regression checks)
- Databases & Information Management
- Systems Analysis & Design
- Git/GitHub, Blender (3D asset creation)
- Troubleshooting & Diagnostics
- Remote Collaboration & Structured Documentation

KEY PROJECTS

Desktop Applications (C++ / Qt6) | University of South Africa — Final Year

- File Manager — built using Qt6 Widgets, with signals/slots driving UI interaction and file-system operations
- Network Viewer — desktop application for viewing and interacting with network data, incorporating multithreading to keep the UI responsive during operations
- Database System — Qt6 desktop application with full database integration for structured data storage, retrieval, and management

WORK EXPERIENCE

Game Design and Development Tutor | Kodland 22/12/2025 – Present

- **Game Design & Development Tutor | Kodland**
22/12/2025 – Present
Tools: Roblox Studio, Lua, Python, Blender, Zoom, Google Classroom, Slack
- Deliver game development, programming, and 3D design instruction to **international clients** using Lua, Python, Roblox Studio, and Blender.
- Provide **technical support and troubleshooting** to clients and parents, resolving software, platform, connectivity, and project-related issues.
- Test and review client-developed games, identifying **bugs, scripting errors, and gameplay issues** and providing clear, actionable feedback.
- Build strong relationships with international clients through **clear communication, problem-solving, and a customer-focused approach**.
- Manage client schedules, progress, records, and communications while collaborating with internal teams in a **remote international environment**.

Customer Technical Support Specialist | 5CA 22/09/2025 – 20/03/2026

Tools: Salesforce, SAP, Microsoft 365, internal CRM/ticketing platforms

- Diagnosed and resolved technical, account, and access issues for international clients, fully remote
- Maintained detailed, reproducible documentation of issues for tracking, escalation, and reporting
- Managed customer interactions using CRM systems (Salesforce, Zendesk, Freshdesk)
- Provided Technical Support and Customer Support to a global user base

- Handled billing and financial queries while ensuring compliance and data accuracy
- Handled billing and financial queries while ensuring compliance and data accuracy
- Career Transition: **Contract completed successfully and project objectives achieved within the set timeframe.**

Web Administrator | StudyHalo 15/02/2024 – 20/12/2025

Tools: Backend systems, databases, APIs, web-based CMS

- Assisted in developing, maintaining, and updating website functionality and digital learning platforms
- Worked with backend systems, databases, APIs, and structured workflows to support platform reliability
- Assisted with QA testing, feature validation, and improving user experience across web-based systems
- Supported troubleshooting of website issues, access-related problems, and usability improvements
- Career Transition: **Pursued external opportunities for professional and personal growth.**

Education Assistant (ICT) | Greytown Junior School 06/06/2025 – 20/09/2025

Tools: Backend systems, databases, APIs, web-based CMS

- Troubleshoot basic hardware and software issues.
- Assist teachers in delivering lessons that use computers, tablets, smartboards, or educational software.
- Capture, organize, and maintain digital records within the local DBMS (attendance, marks, learner portfolios)
- Deliver lessons relevant to my educational background (Math, Science and PE)
- Career Transition: **Transitioned to a role offering greater professional growth and technical exposure.**

EDUCATION

BSc Computing | University of South Africa February 2022 – October 2025

Relevant Coursework:

- **Advanced Systems Development (INF3705)** — software development and system implementation
- **Structured Systems Analysis & Design (ICT2621)** — requirements analysis and system modelling
- **Databases II (INF3703)** — database systems, transactions, security, performance and web interaction
- **Human-Computer Interaction II (INF3720)** — user interface and usability principles
- **Advanced Programming (COS3711)** — programming, debugging and problem-solving
